## What is claimed is:

- A membrane eraser used for ophthalmic surgery, comprising:
  - a grip portion;
- - an elastic body [fitted along a direction toward a front end of said] having opposite proximal and distal ends and a hollow interior, said hollow interior at said proximal end receiving said second end of said rod-shaped body[to the front end side thereof and having a hollow tapered front tip], said distal end having a tapered tip extending away from said rod shaped body; and
  - a plurality of hard, inorganic fine-grains fixed on said tapered [front] tip of said elastic body [wherein said grains are located in a range of 0.5 mm to 3.0 mm from an end portion of said front tip], said fine-grains configured for removal of membrane tissue on a retina of an individual.
  - A membrane eraser according to claim 1, wherein said elastic body comprises silicone rubber.
  - 3. A membrane eraser according to claim 1, wherein said hard inorganic fine-grains comprise grains having a range in diameter from 3  $\mu m$  to 80  $\mu m$ .
  - 4. A membrane eraser according to claim 1, wherein said hard inorganic fine-grains comprise diamond particles.
  - A membrane eraser according to claim 1, wherein said rodshaped body comprises titanium.
